

Interactive comment on “The fate of seeds in the soil: a review of the influence of overland flow on seed removal and its consequences for the vegetation of arid and semiarid patchy ecosystems” by E. Bochet

R. E. Brazier (Editor)

r.e.brazier@exeter.ac.uk

Received and published: 9 December 2014

The author has made an appropriate effort to include discussion of the importance of seeds in land degradation, with inclusion of a number of references. The author discusses how seeds are important for land management and indeed restoration of degraded landscapes.
