We are sorry that the review did not meet your expectations. You do not specifically say what you found "not very good" about the manuscript, or exactly what you would like to see in a redraft of the paper, which makes your comments rather difficult to deal with. We will, however, be revising the manuscript in response to the comments of Reviewer 1, and we hope that you will find this redraft more to your liking.

Best wishes,

Pete Smith (on behalf of all co-authors).
