Interactive comment on "Vertical nutrient and trace element migration in cambisols after application of residues from anaerobic digestion of manure" *by* M. Sager

Anonymous Referee #2

Received and published: 29 August 2016

Dear Author,

Although your work presentes interesting findings, it needs to be deeply revised before considering for publication.

I would encourage the Author to :

1) Revise the Introduction.

As far as I am concerned, this is not the way of introducing your work. Please delete the subsections and make the Introduction shorter. Also, there is a lack of literature. Please, delete from the Introduction lines 186-210. They should be in the Materials and Methods section.

Printer-friendly version

Discussion paper

2) Revise the way you presented the values (replace "," per ".").

3) Please revise the axis of the figures.

4) Please revise the English (some apparent mistakes are found along the text).

5) Have you checked the citation form for this Journal?
