Appendices

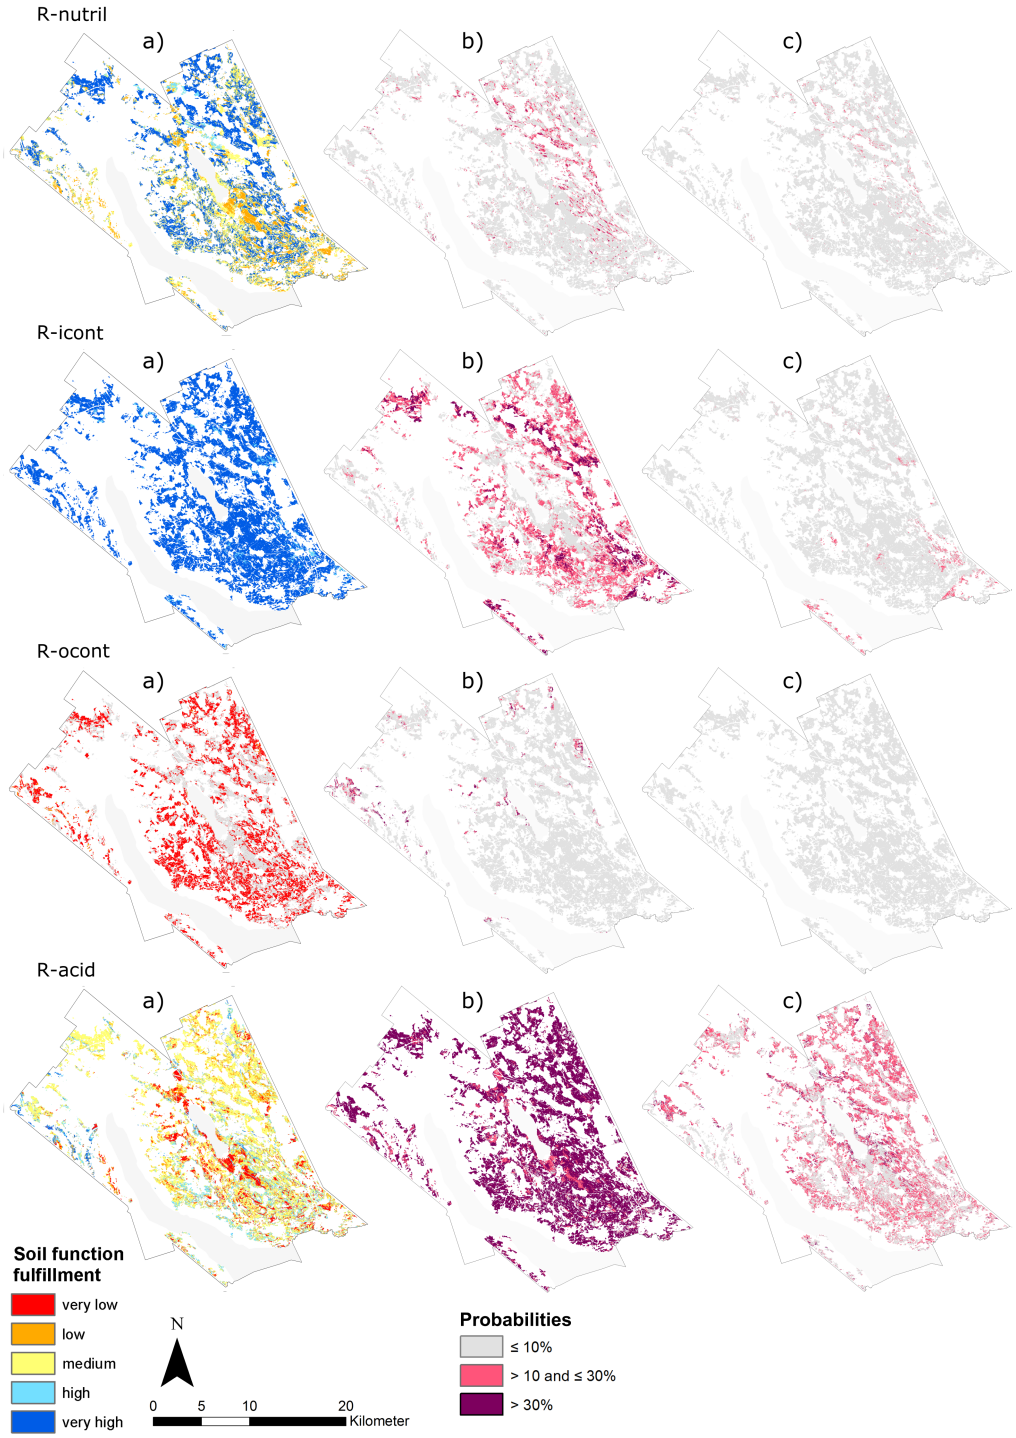

Figure 1: Regulation functions maps for the agricultural land of the case study area and indication of their uncertainties in the ordinal scale: a) mean SFF scores and b) probability that the mean SFF score of a raster cell deviates in the ordinal scale for ± 1 or c) ± 2 or more SFF units (raster cells $20x20m$, $N = 1000$ simulations)

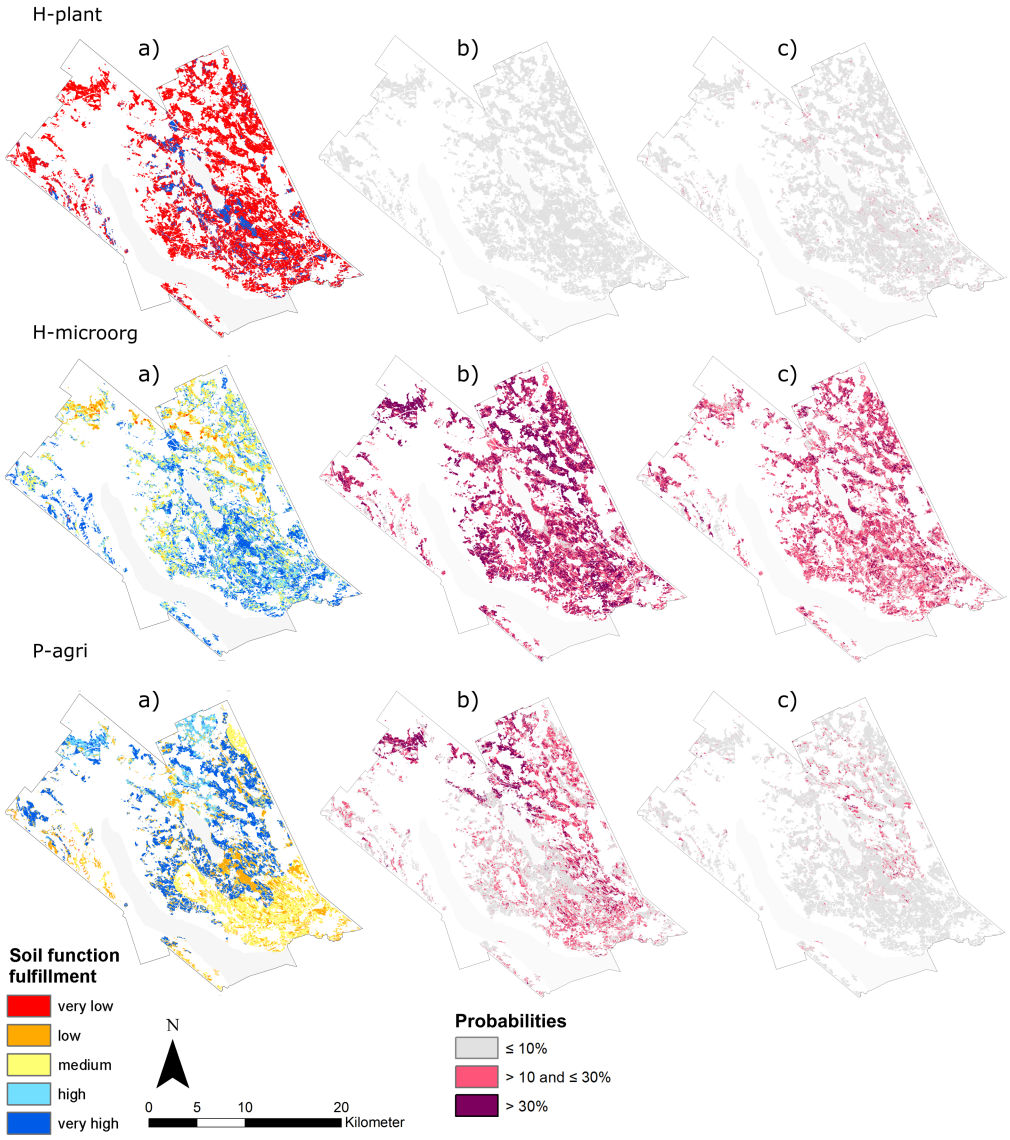

Figure 2: Habitat functions and production function maps for the agricultural land of the case study area and indication of their uncertainties in the ordinal scale: a) mean SFF scores and b) probability that the mean SFF score of a raster cell deviates in the ordinal scale for ± 1 or c) ± 2 or more SFF units (raster cells $20x20m$, $N = 1000$ simulations).
