I’m sorry for that the manuscript give you a bad impression. I have used another statistic method to try to describe the effects of strip and year and used some graphs to replace the tables. As for the mistakes in English, I apologize to it and I admit there are some limitations for me in using English to write a thesis. What’s more, I didn’t pay attention to the details about the font size and layout before. I’m ashamed to give this form of paper to you. I hope you can see the new version.
