Received and published: 29 September 2019

Dear Dr. Bach,

We have now responded to comments of both referees which were essentially directed to style and structure of the manuscript. No essential problem has been found with the science itself. We thank the referees for their appreciation of the work. As outlined extensively in the responses for the individual referees, we have considered all comments and we are working to incorporate them in the manuscript, which we believe will have its readability much improved after corrections.

If you agree we will send the revised version along with the above lines later this week.

Best wishes

C.A. Quesada and co-authors
