I thank both the reviewers and the authors for thorough comments and responses, and invite the authors to produce a revised version of their manuscript based on what they propose as modifications. Since there may be some "structural" changes in the discussion sections, a "track-changes" version of the revision would be useful to identify actions taken.

Regarding the Response from the authors I have the following remark: Ad "Response to the interactive comment by the anonymous referee # 2": In the response to the second part of Comment 2) the authors do not indicate if and how they would adapt
