

Changes made for production

June 30, 2022

We have made some minor changes to the manuscript, listed as below:

- We added photos of the spectrometers in Fig. 5 (P14). Please note that the photos were entirely created by the authors. The results indicated by the figure remain the same.
- The order of the co-authors has also been changed compared with the initial submission.
- We corrected typos, improved grammar, and modified Conclusions for better readability.
